

Environmental Policy Statement And Principles

Hydro International develops and designs, procures, and where necessary installs a range of quality specialist products and services for use in managing and treating Stormwater, Water and Wastewater to help protect people, property and the environment. This policy underpins the strategic aims and objectives of the Business by the following.

Hydro International Is Committed To:

- Controlling and where possible reducing our negative Environmental impacts including preventing pollution from our own activities and contractors working on our behalf.
- Selecting contractors that are committed to following Environmental controls at least as rigorous as ours.
- Conforming to applicable legal and other requirements relating to our environmental aspects
- Ensuring where equipment is installed and maintained on our clients' sites, that our staff and contractors follow working practices that reflect the Environmental sensitivity applicable to the site.
- Try to minimise waste where possible and then dispose of any waste in accordance with Environmental law
- Monitoring energy consumption and using it responsibly.
- Managing our Environmental impacts from travel.
- Managing hazardous substances safely to protect human health and the Environment.
- Ensuring, where possible our operations do not adversely affect the natural Environment.
- Making training and resources available to increase awareness throughout the Company, to ensure that all employees carry out their duties in line with this Policy and are aware of their obligations.
- Making a continual improvement through the setting of objectives and targets for achievement and the operation of an Environmental Management System in accordance with ISO14001.
- Applying this policy to all departments of Hydro International and reviewing it at least on an annual basis.
- Making this Environmental Policy Statement available to all employees, customers and other interested parties on application or from our website.
